PROFESSIONAL SUMMARY

Motivated and detail-oriented Front-End Developer with a strong foundation in JavaScript, React, and modern web technologies. Skilled in building responsive, scalable, and user-friendly web applications with a focus on performance and clean UI/UX. Proven ability to solve real-world problems, optimize application performance, and deliver seamless user experiences.

PROJECTS

YouTube Clone (Video Streaming Platform) | [GitHub](#) | *React, Redux, RapidAPI, TailwindCSS*

Mar. 2025

- Developed a YouTube-inspired video streaming web app with core features like search, video playback, channel details, and related videos.
- Implemented **debouncing** on search input to optimize API calls and improve performance by reducing unnecessary requests.
- Built **API polling mechanism** to periodically fetch updated video data (views, likes, comments) ensuring real-time like experience.
- Used **Redux Toolkit** for efficient state management of videos, search results, and user preferences.
- Integrated RapidAPI (YouTube Data API) for fetching real-time data and implemented infinite scroll for smooth browsing.
- Optimized performance through lazy loading, memoization, and component splitting for faster load times.

Netflix Gemini (AI Movie Recommendation App) | [GitHub](#) | *React, Gemini API, Firebase, TMDB API*

Apr. 2025

- Built an AI-powered movie recommendation application using Gemini API that suggests movies based on natural language user prompts.
- Integrated TMDB API for movie data including posters, trailers, ratings, and cast information.
- Implemented Firebase Authentication for secure user sign-up/login and saved user preferences.
- Designed a clean, responsive UI with modern animations and dark theme for an immersive browsing experience.

Swiggy Clone (Food Delivery Web App) | [GitHub](#) | *React, Redux, TailwindCSS, Firebase, REST API*

May 2025

- Developed a feature-rich food delivery web application inspired by Swiggy with real-time restaurant listings, menu browsing, cart, and checkout flow.
- Integrated Swiggy public APIs for dynamic data fetching and implemented search, filter, and sort functionality for restaurants and cuisines.
- Implemented state management using Redux Toolkit for managing cart, user, and restaurant data across components.
- Built responsive UI with TailwindCSS ensuring seamless experience across mobile, tablet, and desktop devices.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS

Frameworks & Libraries: React.js, Redux Toolkit, Node.js, Express.js, TailwindCSS

Databases & Auth: Firebase (Auth, Firestore), REST APIs

Developer Tools: Git, GitHub, VS Code, Postman, Thunder Client, Vercel, Netlify

EDUCATION

Seshadripuram First Grade College, Bengaluru

Graduated in 2023

Bachelor of Commerce (B.Com)

– Relevant Coursework: Business Management, Accounting, Financial Management, Economics.

CERTIFICATIONS

– Skyscanner Front-End Software Engineering Virtual Job Simulation — Forage (May 2025)
